B or 92 Mindszenty, József, Cardinal 49-11764

"This new addition to Mindszenty literature deals in Part I with Hungarian peasant life as background and with the growing antagonism between the Cardinal and post-war Hungarian governments. Part II describes in great detail arrest, 'processing' of Mindszenty and the trial with almost 70 pages of verbatim cross examination. Part III gives excerpts from the Cardinal's papers and an appendix contains also an interesting legal comment by Sir David Maxwell Ffye, the renowned British prosecutor at the Nuremberg trials." "Alan Swallow has again given notable service to American letters by reprinting some of our most distinguished essays on literature. . . Mr. Tate falls occasionally into an error which he himself has castigated as the discreditable 'Long View' of history. Thus, although his examination of the philosophical meretriciousness of 'positivist' criticism and scholarship is brilliantly executed, he oversimplifies the problem by neglecting to remember that many important traditional scholars of our time would hardly acknowledge kinship with the downright German philologists." TAYLOR, ALAN JOHN PERCIVALE. Habsburg monarchy, 1809-1918; a history of the Austrian empire and Austria-Hungary. new ed 279p il $3.50 Macmillan

943.6 Austria—History [49-19763]

"In 1941 Mr. Taylor published an excellent study of the Habsburg Monarchy. He has now produced under the same title an entirely new work. The narrative has been extended in point of time to cover the years before 1815 and events in Central Europe after 1918. The structure of the earlier book has been modified both in content and in interpretation, giving a closer examination of the relations of the Habsburgs with the outside world. Like the book as a whole, this is a study in failure, in the steady decline of Austrian influence in Europe and the successive loss both of territory and diplomatic initiative in the three historic areas of Habsburg enterprise—Italy, Germany, and the Balkans." Manchester Guardian

"Mr. Taylor, a fellow of Magdalen College, Oxford, and a prolific writer on international affairs, displays a thorough knowledge of facts. Yet in spite of it he does not appear to have grasped the quite unique quality of the Austrian problem which was preeminently a human problem complicated by dynastic interests. . . Through its writers, artists, and scholars . . . Austria has exercised a deeper and more lasting influence on Europe than through all its 32 Habsburg rulers. Unfortunately, none of these is mentioned in Mr. Taylor's book. . . Mr. Taylor is very quick and apodictic with his verdicts on personalities—and often wrong. . . However, credit is due to him for adhering to the correct spelling of the Habsburg name." E. S. P.

Titles apart, however, Mr. Taylor has written a very good book indeed, brilliant, acid and penetrating. . . His writing owes a great deal of its vitality to his sense of controversy and to his sharp awareness of the present all the time that he is writing about the past. He has a wicked eye for the pretentious; nationalism is neatly characterised as a matter of finding jobs for the intellectuals in the bureaucracy. But running through the whole book is a serious argument sustained with rare lucidity as well as force." Alan Bullock

Strange, therefore, that such elaborate gestation should result in a production so puny. For Mr. Taylor, it is necessary to report, quite ignores the tricky chemistry of alkaloids. He has practically nothing to say about the physiology of narcosis, and less about the insights which narcotic drugs afford into the structure and workings of the human personality. "Dr. Tead, whose leadership in the field of higher education is well established, has drawn upon his experience as chairman of the New York City Board of Higher Education in setting down principles for the improvement of college teaching. He is especially concerned with four major aspects of the problem: the teacher as person, the teacher in action, the nature of learning and the improvement of teaching and learning. . . Deploring the defeatist attitude of many educators, Dr. Tead urges that college presidents, academic deans and all others responsible for the hiring of professors recognize the need for teachers who not only know their subjects but know how to present them interestingly. And he recommends that the process by which students are selected and trained to be college teachers be reorganized." N Y Times

"Dr. Tenenbaum tells, in sober prose, the tragedy that befell the Jews. He visited Warsaw, Cracow, Lodz, and Wroclav in a brief tour from April to June 1946. His impressions form a very small part of the book. The story of the Warsaw ghetto, told in much greater detail than the rest, is a third of the whole. A slightly larger portion reviews the history of the Jews in Poland, and of their long struggle towards a nationalism. The remainder goes into the ghastly details of the German camps of extermination." (Sat R of Lit) Bibliography. Index.

"The book is a worthy and illuminating historical survey for the general reader, as well as a guide to later scholars. THIRKELL, MRS ANGELA (MACKAIL). Old Bank House. 345p $3.50 Knopf

49-10226

Continues the author's chronicles of her imaginary English county called Barsetshire. Sam Adams, who has made "pots of money," buys the Old Bank House, to the chagrin of the county people. But Sam was too clever to thrust himself forward, and clever, too, in selecting a wife. In time he was a welcome addition to the community.

"Granting the grave deficiencies of awareness, the provinciality, the insularity, the confirmed faith in 'breeding' . . . there are valid things here, there are virtues to be acknowledged. Not merely is it the sharp shrewdnesses, in the Jane-tradition, nor the passages of utterly beguiling nitwittery. There is something more, something deeper, something not to be invalidated by Mrs. Thirkell's own circumscribed concept of it. Perhaps one could best speak of it as a warm loving-kindness—permeating, on one level, the whole of her work." Doris Peel

"Barsetshire would not be Barsetshire—one is almost tempted to call it Thirkellshire—without its quota of old familiar friends. . . And their conversations are as amusing as ever. They are somewhat wistful as they cope with some of the problems of present-day English peace. . . Few authors are more expert than Angela Thirkell at catching the foiblesome workings of the undisciplined feminine psyche on the loose. And her satire is always just, apt, kindly, and pleasantly rambly. Blended in with the satire, too, are all the pleasures of an escapist romance." Blythe Morley

THOMAS, GILBERT OLIVER. William Cowper and the eighteenth century. new rev ed 347p $4 Macmillan

B or 92 Cowper, William 49-9025

"For one reason or another, the gentle eighteenth-century recluse William Cowper continues to interest us. Psychologists delight in analyzing the causes of his recurring mental breakdowns. Literary historians find significance in his pre-Wordsworthian poetry of nature. Devout churchgoers find solace in his Olney hymns. And lovers of animals remember with affection his hares, his dog and birds. There has been a long succession of books and articles about him. Mr. Gilbert Thomas' study first appeared in England in 1935, but not having been published here, was not as widely read in this country as it should be. Now, after having been long out-of-print, it is reissued." N Y Times

"Mr. Thomas finds it expedient to go into a detailed analysis of Methodism, an analysis which often becomes a militant defense and which constitutes some of the most fascinating pages in the book. . . Since Mr. Thomas' chief aim has been to understand the man in relation to his century, 'it has been necessary,' as he says, 'to disturb a certain amount of dust.' Such a statement disarms the criticism that portions of the book might have become less dusty with condensation. . . His 'labor of love' is a thorough, detailed, documented life, interesting, enjoyable, a successful vindication of the self-styled 'stricken deer that left the herd.' " C. T. Houpt
+ **Christian Science Monitor** p16 Ag 4 '49 420w

"The well-known story of Cowper's pathetic life is attractively told. There is an infectious quality about the writing that mirrors the obvious partisan enthusiasm of the author for his subject. Moreover, this sympathetic portrait is adeptly interwoven with critical analyses. Particularly good is the analysis of Cowper's poetry of nature, reflecting as it does so well the eighteenth-century worship of perfection in nature, and combining with it the belief in a personal God working in and through His creation. Mr. Thomas' term 'bridge-builder' when describing Cowper the transitional poet, is well chosen. But the most important contribution of the book is the emphasis throughout on the importance of the Evangelical movement to Cowper, as man and poet." J. L. Clifford

(Publisher's note) Notes on books and abbreviations. Index.

"While the book is worthy of all praise as a thorough, fully documented investigation of a difficult subject, it is not easy to read or to use. A mass of detail often obscures the main topics, and it would have been helpful if the author had added a brief summary to each chapter, pointing out its most significant features. The notes are composed in a telegraphic style and sometimes run to nine or ten lines." M. L. W. Laistner

"J. Oliver Thomson, author of the present work, is a classical scholar rather than a geographer, but this has made him acutely aware of the difficulties inherent in some of his source material. Where only scraps of information have survived he knows how to evaluate their reliability, and deplores these cases where records of travel and exploration are available only at third hand. . . He writes with considerable knowledge of the various barbarian tribes and of their inroads into the ancient world. Not content with the usual sources, he has also consulted Chinese records for references to migrations. His knowledge of ancient place names is also wide." Samuel Thorne

"The book is a scholar's work for scholars, not for the general reader, and perhaps the fascination which it may have for the latter lies in a purely derivative feature. . . THRUPP, SYLVIA LETTICE. Merchant class of medieval London (1300-1500). 401p $6 Univ. of Chicago press

323.32 London—Social conditions. London—Economic conditions. Merchants 48-3697

"This book is in no sense a general economic or institutional history of medieval London. Its intention is simply to explore the social context in which the activities of London merchants took place. . . Only the main contours of life appear, forming a general pattern of common or similar experience. This does not explain cases of exceptional initiative. But it enables one roughly to plot normal family cycles in the accumulation and dispersal of wealth and to recognize the chief social influences, as distinct from political events and policies that affected economic affairs, to which these were subject." Introd.

"Social and economic history does not have to be written in this fashion. We have very good examples of delicate and readable interweaving, imagination, and interpretation in the works of those to whom Miss Thrupp pays homage in her preface, Professors Power and Postan, and in the writings of Unwin and Tawney. Miss Thrupp indubitably has at her fingertips a vast amount of laboriously won information, and it is to be hoped that she will now undertake a smaller, more interpretative book to do for her subject what Miss Power did for the wool trade in medieval England." THURMAN, HOWARD. Jesus and the disinherited. 112p $1.25 Abingdon-Cokesbury

232.9 Jesus Christ—Teachings 49-8371

"Jesus' words were directed to a disinherited people. In this brief, penetrating book, Dr. Thurman analyzes these words with regard to the Negroes, the Jews, and other minorities of today—and proposes the Christian solution to one of our greatest problems." (Publisher's note) The author is co-pastor of the Church for the Fellowship of all Peoples, San Francisco.

"Coming as it does from one who has known the world of the disinherited not from hearsay and yet who has consistently chosen to transpose barriers and to experiment with fellowship across boundaries, the book has a particular ring of the authentic about it. The arguments against Paul and his tradition want a deeper substantiation than is to be found here, and the invitation to adventure across boundaries needs concrete illustration and more tangible suggestions and development. But the approach to Jesus as having a peculiar message for the disinherited and for the occupied countries, is a fruitful one as thousands of Norwegian and Dutch and at present German Christians can testify." Hans Tietze, an art scholar and writer of international standing, has taken up this problem. . . Beginning with a supposedly antique medal foisted on the Duc de Berry about the beginning of the fifteenth century, Tietze traces the story of fraud and detection down to the celebrated sculptural forgeries of antiquities by Dossena, the famous collection of 2,400 spurious Corots and the Vermeer productions of van Megeren sold to Goering during the war. "[Novel about] some Italian granite-cutters in Vermont, among them Pietro Dalli and his wife, Maria. All the workers in the district live in fear of the deadly granite dust, which finally brings about Pietro's death from tuberculosis. To act as a sort of commentator on her characters, Miss Tomasi introduces Tiff, an old Italian schoolmaster who lives with the Dalli family." New Yorker.

TOMASIC, DINKO. Personality and culture in eastern European politics. 249p $3.75 Stewart

914.97 Eastern question (Balkan). Yugoslavia—Social life and customs. Ethnology—Yugoslavia 48-28195

"This study undertakes to explain the political instability, the hegemony of the military, and the dictatorial aspects characteristic of the regimes since the Middle Ages in the area between the Baltic and the Mediterranean. The specific countries include Yugoslavia, Bulgaria, Albania, Romania, Hungary, Czechoslovakia, Poland, and, incidentally, Greece. The author, now a sociologist at the University of Indiana, recognizes the part that successive religious and imperialistic conflicts have played in this instability, but he sees 'the interrelations of the three basic structural elements of the countries of Eastern Europe—the herdsmen, the peasantry, and the urban strata' as factors of primary importance for understanding events in this area." Am Soc R

"The main idea of this extremely interesting study in political sociology is that eastern European political life differs from that of the rest of Europe and that these differences are to be explained by special features of the leading political personalities of the East. Those personalities are shaped in a special way by the cultural traits of the respective societies in which they have been raised, chiefly by the family." Otakar Machotka

+ **Am J Soc** 55:104 Jl '49 950w

"The study is timely, both because Eastern Europe—a crucible of world wars—has been somewhat neglected by Western scholars and because the present situation in the Balkans deserves closer investigation. . . On the whole, the book is a valuable contribution to the study of eastern Europe, although one might take exception to some statements made. The reviewer was struck by a somewhat rash tendency of the author to include Poland in the chain of states under consideration and to extend to her those observations which seem to be true in the case of the Balkans." George Lenczowski

+ — **Am Pol Sci R** 43:611 Je '49 600w

"Though coming from Yugoslavia, where he was on the staff of the University of Zagreb, the author demonstrates a thorough acquaintance with American sociology and a flawless literary style. + **Am Soc R** 14:326 Ap '49 400w

"Much information is to be found here that is omitted from current volumes on eastern European developments. It is a more permanent, basic study—the chief weakness of which is an academic passion for differentiating, defining, classifying. Many of its eggs are pebbles, some of its pebbles are nuts, and a large proportion of all three are professional fantasy." R. H. Markham

"To read this book is to come a little closer to a realization of what makes the difficulty of the Eastern European political scene. But it is not to leave it with the sense that, now that all is clear, the situation can be treated wisely and with a sure touch. Mr. Tomasic does his best work when he presents, in the language of contemporary students of culture and personality, the character of the Dinaric and the Zadruga groups, the type of contrasting personalities which are developed within them, and the way these have evolved in the past, in the transposition from a rural to an urban millieu, and under the impact of clashing religions, clashing nationalism, and, more recently, clashing ideologies. He is least effective when, in a final chapter, he offers suggestions for a 'planned transfer of minorities on a voluntary basis.'" Jane Belo

"The author has succeeded best with his chapters on Sweden and Denmark, from the Kalmar Union to the days of Bernadotte. In these chapters, making up about two thirds of the volume, the author's narrative is uniformly well composed and presents a generally coherent picture of developments in the two countries. . . The volume as a whole, however, is marked by some lack of proportion. Quite noticeable, in view of the author's evident intention to emphasize developments which have been of importance to Britain, is the scant treatment of Norway. . . Some typographical slips would be eliminated through further proofreading, but others suggest a basic unfamiliarity with the material in hand. . . On two important periods, the Viking age and the modern period, the treatment is sketchy and inadequate. . . There is no doubt that this lucid and up-to-date account of the history of Scandinavia will be valuable to everybody in need of information on the subject, particularly because so few Englishmen are able to read a book in any of the Scandinavian languages. As a Norwegian, however, I must admit that the reading of the book leaves me disappointed. It is true that for the period 1450-1814 Norway was the weaker partner in a very firm union with Denmark. The author may be justified in treating the history of the two countries together in this period, with the stress on the more important of the two. But there is no similar justification for the lack of separate treatment of Norway in mediaeval times, nor for merging the histories of Norway and Sweden after 1814, when the two countries, in spite of the union under one king from 1814 to 1905, developed along completely different lines." TREASE, GEOFFREY. Shadow of the Hawk; il. by Joe Krush. 236p $2.50 Harcourt
49-10053

Story of Alan Drayton's search for a lost Greek play said to be in a lonely monastery on the Lake of Varna in Eastern Europe. Aldus and Erasmus wanted the manuscript to print; the evil Duke of Molfetta ("The Hawk") wanted it for his library. On the way to Varna from Venice Alan was joined by Angela d'Asola, Aldus' niece, who was intrigued by both the search and the searcher. There were difficulties with pirates, the Duke's men, and Turks; but eventually the book was found and printed by Aldus. For grades 7-9.

"The Renaissance background is not sharply enough drawn to give much sense of period and place; interest in the story lies chiefly in the hazardous adventures of the journey and the grim experiences in the monastery."

"A new, fully annotated edition of the splenetic travel book that caused most Americans of the eighteen-thirties to feel that its author manifested an even greater want of refinement than was attributed to them in its pages. A large part of Mr. Smalley's biographical introduction is given over to Mrs. Trollope's sojourn in what she called 'the triste little town' of Cincinnati and to the economic problems that undoubtedly made her far less charitable about her new surroundings than she would otherwise have been. This book is designed to help people within and without the church to face some of life's more significant experiences in the light of a vital Christian faith. Successive chapters deal with marriage, birth, work and death, and in them the author points up the meaning of religion to marriage and the home, to one's vocation and to the experience of sorrow and death. These supreme moments of life should be doorways into a greater life and not simply dull and prosey experiences." Kirkus

"The 'Wagner' of the late W. J. Turner is an unrevised reprinting of a misbegotten book first issued in 1933—and therefore without benefit of the massive research contained in the four volumes of Ernest Newman's great 'Life' (1933-'46). Turner was a fine writer and keen critic of music who detested Wagner and adored Berlioz, and this book was an explanation of his preference for the Frenchman. It is prejudiced and mean, and it treats the last fourteen years of Wagner's life (after the death of Berlioz) with a skimpiness that is ridiculous." Herbert Weinstock

"To encompass both the personality and works of such colossal figures as Richard Wagner within such limited space would be an impossibility. The authors therefore decide to focus their attention on the man, mentioning his music only in passing. . . However, while reading through accounts of Wagner's flirtation with the daughter of a Vienna pork butcher . . . one becomes aware of the basic weakness of the volume—the concentration on petty idiosyncracies, without the rewarding analysis of genius. . . "There is a startling change of pace when the biography reaches Wagner's fifty-third year. To this point everything is judiciously contrived. The author omits nothing of major import, and finds room for some revealing documentation. The final seventeen years of Wagner's life, however, he summarily dismisses in four pages! Since it took Ernest Newman 713 pages of considerably larger format to relate the events of this same period, the reader can draw his own conclusions. Such quixotic organization rather lessens the value of an otherwise admirable short biography." Roland Gelatt

UHDE, WILHELM. Five primitive masters; tr. by Ralph Thompson. 98p il $7.50 Quadrangle

759.4 Painters, French 49-9074

"Written by one of the foremost students of naïve painting (Uhde, died in 1947) . . . this book explores the careers of five such painters —Louis Vivin, Camille Bombois, André Bauchant, the Douanier himself, and Séraphine de Senlis, all of whom Uhde knew personally. . . They were naïve because of their economic and social backgrounds, he says, which in all cases were so poor as to keep them from contact not only with art schools but with advanced thinking generally. But he maintains that their lack of schooling was no detriment to their genius, and there are thirty-five illustrations, four in color, to support his claim." New Yorker

"Separated by twenty years from his memories, and having to rely almost wholly upon

them, Uhde writes with the touching enthusiasm and inaccuracy of old age. A statement of Apollinaire's is attributed to Jarry (the story of how Rousseau carefully measured each part of his subject's face before starting a portrait); the achievements of other connoisseurs are slighted; and the author insists almost petulantly on his own importance. Despite such flaws, this book remains a fascinating document on the genius of the painters Uhde knew so well, and, more important, on the nature of the taste that discovered primitive art in the opening years of this century." "The text is accompanied by thirty-two full-page black and white illustrations and four color plates. It is regrettable only that these reproductions are not dated and do not include some of the works specifically mentioned or analyzed by the author. While Uhde insists that the true content of the works of these painters is 'the emotional richness of their inner lives,' he does not quite offer us a key to the mystery of primitive art, in tracing the delicate borderline between real naivete and awkwardness." "The new slant, which yields the freshest and most entertaining material of the book, is the introduction to the lay concert-goer of what constitutes backstage shoptalk among professional musicians—chiefly inside stories on production costs, professional training, critics, conductors, and the musicians' temperament. . . The other, more traditional 'appreciation' sections evoked a less favorable reaction in me, although in all fairness I should admit that Mr. Ulrich does not mean to address the professional musician. . . American readers may be affronted by the description of our policy in Germany as one of 'vengeance'. . . "A great amount of work went into this book. A great amount of good can come from it. Human history, geography, economics and sociology are combined with sound advice with which there can be no disagreement. The South knows too little about itself, and a principal reason is that there has been no textbook for public school students which dealt with the region in terms of its resources and their proper use. Now such a textbook is available, and its use should be mandatory in Southern schools." Hodding Carter

VAN DE WATER, FREDERIC FRANKLYN. Catch a falling star. 362p $3 Duell

A historical novel, the scene of which is Vermont during the Revolution, when that state was practically a small independent republic. The theme of the book is a revaluation of the brothers Ethan and Ira Allen. The hero is Olin Royden, a follower of Ira, and his pursuit and final rescue of the beautiful young girl Faith Marshall, provides the love story.

To a modern ear, moreover, some of the people—especially the lovers—have a wooden speech. Even though this may have been eighteenth-century talk, the result is to make the people more theatrical than dramatic. "This brief critical biography maintains an admirable balance between narrative and comment and is a model of its kind. Mr. Van Doren, a poet here writing criticism, does full justice to Hawthorne, who was a poet writing fiction. He has weighted the findings of the most recent scholarship, as well as the older biographical and critical studies, and blended them into a beautifully written and fresh interpretation of Hawthorne and his work. "Though Hawthorne has received the best criticism of any American novelist . . . there is need for two kinds of restatement—a serious biography that will restore him as an artist, and a sustained examination of the themes and values in his work. The first of these is accomplished brilliantly in Mark Van Doren's book. I suspect, without justification, I hope, that Van Doren's book will not receive its due in the more serious journals; it is the kind of biography that can easily be dismissed as 'impressionistic.' . . As criticism his book is not so thorough or brilliant as those of other Hawthorne analysts, but within its scope it comes as close as a critical biography can come to being a work of art." Mr. Van Doren's 'Hawthorne' will survive the competition; it is well-balanced, sensitive and—in spite of what seems to me some weaknesses in judgment and interpretation—generally the best of the critical books about Hawthorne since Henry James wrote the first of them in 1879." The reconciliation, logically and sensibly, of these contradictory aspects of his subject's nature obviously made the book a fascinating task for its author, and his successful solution of the problem is what makes this study the admirable piece of critical biography it is." VAN PAASSEN, PIERRE. Why Jesus died. 283p $3 Dial press
232.9 Jesus Christ—Biography 49-10707

"Van Paassen explores the apocryphal gospels and other sources for the study of the formative years [of Christ's life], and recreates a picture of the life and times, indicating as he does this, the contradictions, the interpolations of the evangelists in subsequent writings in order to expand incidents to fit the needs of conversion. He proves Jesus' intense Jewishness, suggesting that attempts to contradict this are Christian additions. . . Van Paassen explores, too, the revolution Jesus was supposed to have preached and finds in his own exegesis that there was a very human tieup with the Zealot movement, a hope for realization that took him to the danger spot of Jerusalem, and a perhaps belated return in his final acceptance of orientation towards the kingdom of God. But it came too late; Pilate had no alternative than to decree crucifixion. The step by step analysis of the contradictions in historical possibility as against the gospel version of the resurrection discounts the mystical aspects, and van Paassen claims that the truth, in itself sufficient, was deliberately obscured to suit a pagan doctrine written in by missionary apologists three generations after Jesus' death. Actually, in so doing, the early Christians created the myth of Jewish responsibility and blame, with deliberate intent." (Kirkus) Supplementary reading.

"The book is, I am sorry to say, anti-Christian in effect. Mr. van Paassen is a devout secularist, and he is enchanted by a mystical vision of the kingdom of God on earth. In the cause of secularist messianism he has attempted to enlist Jesus himself. Christianity is the great adversary of this cause; it is no wonder that the militant defenders of secularism such as Marx, Lenin, and Stalin must crucify Christianity. Mr. van Paassen will do well to look closely at the men with whom he makes common cause and see whether his 'historical Jesus' belongs in such company." J. L. McKenzie

On what authority does the author present this drastic revision of the familiar story of Jesus? . . I think it may be fairly said that 95 per cent of this is van Paassen and it does not represent the consensus of leading scholars. But it is in reading his just judgment of anti-Semitism back into his theory of the willful juggling of historical facts that is his greatest peril. The facts cannot be so simple or the motives so sure." L. T. Pennington

"Comprises the first complete English translation of one of the great classics of human anatomy, together with the facsimile of the 1543 edition of the text, of which only 20 copies are extant. A full critical apparatus of commentaries, annotations, brief biography and bibliography, together with various prefaces, round out the volume." San Francisco Chronicle

"Mr. Lind's translation, which undoubtedly will cause controversies among classical linguists, thanks to Vesalius' use of a corrupt Latin, sprinkled with new terms of his own invention, is authoritative, and the notes by Dr. Asling are helpful in bridging the gaps between Vesalius and modern anatomical knowledge. The publication of this book, the first translation of a complete work of Vesalius—one that should be read by every student of anatomy and, more important, by his instructors—should help do away with Harvey Cushing's apt comment that it 'has probably been more admired and less read than any publication of equal significance in the history of science.'" VICTOR book of operas; rev. and ed. by Louis Biancolli and Robert Bagar. 11th ed 596p il $3.50 Simon & Schuster

782 Opera—Stories, plots, etc. 49-4538

"The book, first issued anonymously by the Victor Talking Machine Company, was the work of various hands. It went through many editions, with changes chiefly in its listing of recordings and in pictures, and in 1939 it was reedited for the tenth time by Charles O'Connell, author of The Victor Book of Symphonies. It has now been completely revised and brought up to date, with the addition of many operas previously untreated, by Louis Biancolli and Robert Bagar, music critics of the New York World-Telegram." (Publisher's pref) The arrangement is alphabetical, by title of opera, and each inclusion follows a general plan, a descriptive note placing the opera in the composer's history, notes on the composer, the production, cast of characters, and a descriptive scenario of the plot, act by act. The available RCA-Victor records are given under each opera.

"Of course there have been plenty of other opera books, some more complete than the fullest edition of The Victor Book and some better written. But Victor always had its two special features: the location of the aria titles in the running text, and the profuse illustrations. When asked over the Library desk for an opera story book, I always preferred to give this one for just these reasons. Sometimes readers would object with remarks about commercialism, but they usually ended by liking it. 'The first catalogue of its kind' remained unique. The new edition has undergone the most drastic alterations in Victor history, yet the old claims can still be made." P. L. Miller

VIDAL, GORE. Season of comfort. 253p $3 Dutton
49-7028

"Central theme is the largely unconscious struggle of Bill Giraud to escape the domination of his selfish mother and to avoid the temptation to conform, to be something other than the painter he wants and needs to be. The story of his growing up between two wars, of his physical and spiritual maturing in the midst of a political family (in and out of Washington)." Library J

"Mr. Vidal shows signs of relying on his 'know-how,' which is considerable, rather than on creative effort. His story is deftly told, his characters are skillfully described, but no deep tensions, no deep emotions, are generated. What is clearly intended to be a novel of acute psychical conflict reads in large part like a brisk account of growing pains." C. J. Rolo

"The final scene in which the mother and son break apart is written in a parallel construction—the son's part on one page, the mother's simultaneous part on the adjacent one. Although this is handled as skillfully as possible, the device doesn't offer enough beyond what could be conveyed in straight narrative to make it anything but tricky. The other major flaw in the book is Charlotte's relationship to her son. . . This is, however, an interesting book. Mr. Vidal has drawn with precision a series of complex relationships among his characters. He has described with understanding a certain political atmosphere and the rather unhealthful atmosphere of a boys' boarding school." Barbara Klaw

"Mr. Vidal is attempting to work out his own manner. The unhappy result is a kind of writing filled with uninteresting, mismanaged sentences, which are haphazardly thrown together into paragraphs uniformly pathetic. . . The chapters are chaotic: each is intended to center about a particular event, but the event (birth, death, christening, party) is invariably neglected in favor of unimportant conversations or a series of badly arranged, inconclusive flash-backs. As a result there is no real scene anywhere in the story. . . Worst of all, there is in the book a complete absence of anything honestly interesting. At various times Mr. Vidal pretends to be writing about the political world, the South, adolescence, and love; but he fails to treat any of these themes with insight or thoroughness. Actually, he has no theme at all; he is simply writing about his characters, and they are dull." W. F. Weaver

VIERECK, PETER ROBERT EDWIN. Terror and decorum; poems, 1940-1948. 121p $3 Scribner
811 48-8754

For descriptive note see Annual for 1948.

"A collection of poems covering the years 1940 to 1948—poems at once realistic and idealistic, poems which have an inner seriousness despite a form which is often pure comedy. A perfect instance of this is his 'Ballad of the

VIERECK, P. R. E.—*Continued*
Jollie Gleeman,' a poem which is written in a phony archaic language. . . Yet the poem, despite the apparent parody, has in it the true element of strangeness and terror. . . Of the war poems, the 'Ode to Throne and Altar,' 'Convoy from New York,' and 'Vale from Carthage' are the most instantly touching. I enjoyed Viereck's lively historical sense, his love of fun, and the skill with which he re-states the traditional and great poetic themes. . . All in all, his book sets a consistent and remarkably high level." Edward Weeks
+ **Atlantic** 184:83 Ag '49 360w

"Peter Viereck's poems, for the most part, it seems to me, are the results of forced fancy, of imagination over-driven by a sort of imagery-engine. . . At their best these poems describe a horrifying, harsh world not even our own but always five centuries ahead. . . Mr. Viereck's poems are too often built around a borrowed bit of Elizabethan intensity or a fragment of the 18th century's clarity and rigorous technique. Bits of Chaucer will make any poem glisten if the right bits are chosen, but should poetry feed on itself like this? . . All this is not to say that Mr. Viereck's poems are not successful in their harsh, unpoetical, but technically polished way. His poems however are a perfect illustration of the proverb: One may be a visionary and a visionary with all the correct myths, symbols, and assorted gobbets of erudition in their right places and still not be a poet." James Reaney
— + **Canadian Forum** 29:22 Ap '49 230w

"Many of the poems in Terror and Decorum do not seem related in any specific way to the theme of the book; and many of these are either boisterous, or abstruse, or macabre. The tone generally is one of sophisticated humor which occasionally takes a sardonic or a petulant turn, after the manner of an astringent Omar Khayyam. But in half-a-dozen poems (and especially in the 'Author's Note on Marabouts and Planted Poets') Viereck states his theme well enough and seriously enough to be considered as a talent and as a man—perhaps a little too full—of theories." J. H. Johnston
Commonweal 50:418 Ag 5 '49 1000w

"The poems are lively and a few of them sustain a neat, coarse clarity and a satiric turn of fancy that is not disagreeable. . . Viereck's wit is frequently dreary. He has a warm, breezy, familiar way of being acutely embarrassing, as when he calls, in a poem to Hart Crane, 'Hey, Hart, don't jump.' . . . The book also contains a brief prose insertion in which Viereck discusses the poet as 'culture-hero' with a glibness that puts the reader at ease: here, at least, is no such formidable figure—just a man who knows all about it. The favorable reception of this patter may be significant, but I judge it to be momentary, for Viereck has as yet written very little to which one could wish to return often or with serious interest." Robert Fitzgerald
. **New Repub** 121:17 Ag 8 '49 750w

"It is hard to read these verses seriously because, though Viereck has many lively talents, he seems to have no personal language. . . There are characteristic poems (For an Assyrian Frieze, Prince Tank, etc.) describing unbridled violence. But the poet's indignation loses its savagery in a feeble masochism; and the underlying self-hatred in turn loses its force in intellectual self-deprecation. . . It is hard for me to notice the virtues in these poems. Viereck has epigram, he can conclude his thought with force and point—this means he has intelligence habitually exercised, and that such learning as he has is systematic, and such words as he has he can control; but how is one to evaluate an epigram that is false? It seems to me that by this means he closes his thinking and, to say it uncharitably, satisfies himself, protecting himself. The error of his propositions is not that they are not all the way to truth but that they shut off, by their form and feeling, any further motion. . . Again he has self-observation—this means that he has made a salutary turn, will not be a literary gangster, etc." Paul Goodman
— + **Poetry** 73:289 F '49 750w

"Mr. Viereck writes of love and conflict as respected ancients might have written if they were living now. Very readable, his poems sing their way along and are charged with meaning." T. H. Ferril
+ **San Francisco Chronicle** p15 F 13 '49 90w

"Among poets of his generation, Mr. Viereck is of that grateful minority who have a recognizable style. His sensibility celebrates the congenial union of wit and fancy, and the offspring exhibit Mendelian variety. Direct feeling is with him recessive, apparent only in a few mild lyrics. He can turn off a gracious light verse—Eohippus—but his serious commitments are to irony and extravaganza. Ease of versification, inventivenes, and the intellectual habit of coherence are his obvious assets. At their best the poems achieve by elaboration of figure and stanza patterns the projection of thoroughly organized schemes. . . Sometimes in bravado of spirit, he does set his ideas dancing, if by no more than sheer speed of language and rhetorical address. Too often the rhythms turn glib, the surrealist images merely chic, and one detects a want of pressure syllable by syllable. Perhaps because limits too preconceived are here set to terrors grown familiar, the poet's struggle is in danger of becoming academic."

"Jose Garcia Villa's first volume of poetry, 'Have Come, Am Here,' showed a freshness of vision and a fine brashness in technique which led us to expect great things of him. While he has by no means lost these early qualities, this new book shows that he has in some degree succumbed to mannerism and self-parody. The freshness of vision is now too often a self-conscious primitivism and the technical liveliness tends to become archness or impudence. Nevertheless, he retains the poet's eye and the poet's ear, and the best poems in this volume have the sharp colors, the cunning verbal precision, and that almost Blake-like combination of innocence and outrage which his earlier poems showed so markedly." A study of the evolution of Herman Melville's masterpiece: Moby Dick. The author, an American authority on Melville, traces the sources of Melville's material, quotes passages from other works on whaling, and discovers how Melville transmuted the original into the gold of Moby Dick. Index.

"The first sections of The Trying-out, dealing with these points, are the weakest: other authors had dealt with them, and Mr. Vincent, through lack of documentary evidence, tends to become overzealous, repetitious, overanxious even. . . None of this is true in the subsequent, and more important, sections. When Mr. Vincent advances from speculation to the documentary, he is richly at home and his defects are shed. And the scholarly work takes its place as one of the most important and deeply entertaining illuminations of this greatest of American novels." Harvey Breit

"Fifteen years after leaving home, Silvestro receives a letter from his father asking him to return to Sicily to see his mother. Curious because the father has deserted his wife, and because he is haunted by abstract furies, he returns for a three day visit. The plot, such as it is, serves as framework for a novel about the dead and dying, suffering, and mankind's disillusionment." Library J

"Twenty-seven years after its first publication, this is still the best book in its field, as this reviewer sees it. It was that even without revision. But the revision was needed, especially to permit the section on church architecture to take account of developments within the last two or three decades. . . In the chapter on the approach to church unity through the development of more satisfying forms of worship . . . the process of revision for this new edition of the book might have been carried farther. Dr. W. E. Orchard was the most extreme practitioner of this method. A novel by the author of the pantomime called The Miracle. It is based on an old legend about a nun who left the convent for a period of years, and became a great singer, during which time the Madonna took her place. Later the nun returned to her convent and performed miracles herself. Part of the action takes place in France during the Reign of Terror.

"The old Flemish legend which inspired Gottfried Keller's The Virgin and the Nun, Maeterlinck's Sister Beatrice, and John Davidson's Ballad of a Nun, is here treated with a sometimes prurient realism which veils still further the original piety, already long lost in a neo-romantic fog lit by flashes of diabolism. It will be sufficient to most readers that they are here offered entertainment in which wars are waged, in which kings and other men of wealth and position fight each other for the love of a singer who later became a saint, in which the quiet ceremony of convents conceals scarcely less tension than does a brawl in an eighteenth-century Paris tavern." Voznesensky's volume on the Soviet economy is undoubtedly one of the most important and revealing volumes on the U.S.S.R. in several years. The translators and publishers of this English version have performed a real service. . . Since its publication Voznesensky's book has been studied intensively by Soviet specialists in all countries. He will find in it, certainly, a great deal of factual and doctrinal material, helpful citations and references, paradoxical statements which invite analysis, and acrid criticisms of the Western world, some of them obviously unfounded. The value of this English edition is somewhat impaired by shortcomings in translation and other errors. Its importance has, of course, been enhanced by the fact that the general editor, whose earlier fame was derived from his role as a prosecutor, has recently become Minister for Foreign Affairs of the Soviet Union. WALKER, MILDRED (MRS F. R. SCHEMM). Medical meeting. 280p $3 Harcourt
49-11189

For twelve years Dr and Mrs Henry Baker had worked in their home to isolate a mold called microcydin, and received excellent results from its use as a tuberculosis cure. At a Chicago medical meeting Henry presented his paper describing the drug, but his discovery had been superseded in an earlier paper describing a superior mold found by doctors working with a large grant. The novel then describes what this disappointment meant to the Bakers' marriage and to Henry's career.

WARD, LEO RICHARD. Blueprint for a Catholic university. 402p $5 Herder

377.82 Roman Catholic church—Education 49-4040

"The idea is very simple. A university has an intellectual end; a Catholic university cannot be satisfied with a purely natural-secularistic approach which may regard Christianity or the Catholic Church as one of many interesting and important fields of study, and even as a means of moral orientation. A Catholic university must have theology at its center, as a knowledge influencing all other knowledge directly and indirectly. It is Father Ward's merit to develop this definition of a Catholic university in a fearless way. . . [He] does not give concrete examples. He is satisfied to quote authorities, criticizing the deficiencies of American, too practical and too confused, education; and he is able to buttress his positive views by highly impressive quotations from the Popes." Commonweal

"Further specifications will be necessary before Dr. Ward's 'blueprint' can be employed in the remodeling of our university structure, but he is to be commended for his forthright discussion of its present status and the changes that will have to be made if it is to serve in an adequate way the interests of the Church in the United States—and in the world of tomorrow." "An essay in political thought rather than in technical theory, this book stresses the developing ethos of liberal society rather than the systems of closet philosophers. The ideas of many individuals, of course, are surveyed, but the emphasis is always on the way in which they reflect general trends. The result is not a full history of constitutionalism. That would need a more extended treatment and more attention to institutions and social forces. Sometimes, too, one feels that an analogy is being passed off as an argument or (as in the connection suggested between colonialism and dictatorship) looks for more concrete illustration than is forthcoming. But this book is a lucid and stimulating study of a great subject. Its author writes within a wide framework of reference not wholly confined to the Western world. He shows a nice sense for the filiation of ideas and sees them against the background of the social situations in which they are born. WEATHERHEAD, LESLIE DIXON. When the lamp flickers. 206p $2.50 Abingdon-Cokesbury

252 Sermons. Jesus Christ—Teachings
49-4951

The out-growth of question-and-answer discussions which the minister of the City Temple, London, has held with his parishioners. Some of the questions are: Did Jesus distinguish between sacred and secular? Did Jesus repudiate the Old Testament? Why didn't Jesus condemn an adulteress? Is any sin unpardonable? Did Jesus really still a storm? Did Jesus praise a grafter? Did Jesus disapprove of wealth? Can a Christian be a Communist? Is every Christian a priest? What is God's plan for the family? Is it unchristian to judge others? Will Christ visibly return to earth? Is Christianity out of date?

"That his answers to these questions are thoroughly evangelical scarcely needs to be said. But they are by no means the answers of the biblical literalist or fundamentalist. Such a book could not be written by a man who does not have a well considered and consistent theology; but also it could be written only by one whose theology is something more than an academic exercise. Weatherhead spends no time in expounding his theology and building his doctrines into a system, but uses it as the foundation, mostly out of sight, on which to build a habitable structure for Christian living."

Novel of life in a South African Anglican convent and the havoc wrought there by a psychic novice.

"I have seldom hit upon a book by an unknown writer so delightful and so accomplished in its artistry. This is a boldly original morality tale, a lapidary satire aimed at the shams of professional holiness and at pseudo-Christians in the service of the Church. Its larger target is the spiritual poverty of present-day Christian society. "That the tale falls short of its promise is due largely to lack of restraint. Situations that would make good drama are over-played. Sybil as clairvoyant is intriguing; in her prophetic role she is absurd. Repetitious bitterness in the description of nuns and clergy—perhaps a reflection of the author's unhappy personal experiences—eventually becomes tiresome. . . The passages which touch on religion give us chiefly clap-trap and pseudo-mystical twaddle. Moreover the author displays an imagination so extravagantly vulgar and so preoccupied with sex that in a less euphemistic day than ours she would be described as a person with 'a dirty mind.'" The regret has two sources, Miss Webster's talent is very remarkable, of a kind not easily duplicated in present-day fiction. If you can imagine a first-rate novelist of social manners—urbane, witty, a fine stylist, an acutely satiric but sympathetic observer of social behavior—who at the same time is concerned to hypothecate man's ultimate fate, you perhaps have some notion of Miss Webster's unusual gift. "The background of this new novel is the newspaper feature business in New York City. A young man, Henry Cade, who has come up from East Ninth Street to the position of sales manager of a news syndicate, decides to start pushing his way to the top, hard. When he pushes, the ones he pushes start pushing back. The result is soon an anything-goes, cut-throat fight, which ultimately ends in disaster." Christian Science Monitor

Weidman can hold a reader more tensely on the mere possibility of violence than most writers are capable of doing by the employment of unmixed mayhem. Having accepted as genuine the phoniness of Pohl's column, he has no place for his fulcrum; he cannot then attribute phoniness to the huckstering uses to which it is put. His book is an attempt to cope with a two-dimensional world which itself remains two-dimensional. It achieves complacence and a clumsy humor, but no tang." Riley Hughes

"When Mr. Weidman is at his best (as he is in this book) he achieves a kind of narrative that—in present day fiction—is very nearly unique. An acute eye and an exact ear for every-day talk produce a detailed picture of one part of the business map of this country; while a moral awareness, as sensitive as a compass needle, points always to the spot where powerful pressures may eventually erupt and blow up the whole map. And these pressures are never manufactured. In this story—as in the best of his novels and short stories—mere contrivance has no place; his men and women find their characters changed by the total of their acts." M. H. Ley

"Mr. Weidman keeps under nice control all the sub-objectives of his story, including jabs at the syndicating people and the communicating of his own amazed view of the modern business-scape. . . There are, nevertheless, a few soft spots in Mr. Weidman's performance. He can be charged with giving Cade far too great an edge in the repartee; words, particularly bright and nasty ones, ought to have failed Cade at least once in a while. Also, the end of the story is markedly splayed. All the same, an A." John Broderick

"The book is conveniently divided in two halves. The first half is a terse and concise biography. . . The second part of Mr. Weinstock's book is devoted to a chronological description and criticism of all the works of Chopin. Here again the author has accumulated an astonishing amount of erudite information, data and facts. At times perhaps his criticism seems a little too subjective, and at times too brief, but for music-lovers in this country it will unquestionably be a source of great interest and information. "Mr. Weinstock's approach is objective, for the most part, at least in the first half of the book devoted to Chopin the man. He accepts as facts only those things that can be substantiated. . . [He] follows Chopin from beginning to end with painstaking tenacity. He has checked with every available document. He has summoned to his aid some of the tiresome apparatus of scholarship, using footnotes to include material that should have been woven into the text or left out entirely. He has a tendency, in the fashion of some scholars, to argue with other biographers about minutiae. There is no doubt, however, that he has done an honest, exhaustive piece of work. There can be some doubt about the value of the second half of the book, which contains a detailed study of Chopin's music." Howard Taubman

The chapter headings are: God, Man, Brotherhood, Faith, Prayer, Humility, Truth, Charity, Righteousness and Justice, Peace, Honesty, Forgiveness; and each chapter includes selections ranging from Scripture to contemporary preachers. The sanction for ethical conduct is simply stated as the requirement for man, exercising moral choice, to follow patterns of behavior exemplified by God. Nothing is said of ritual observance, not even as symbolizing or supporting ethical conduct. The 'questions or thought suggestions' at the close of each chapter would indicate that the book is intended for use by young people's discussion groups." Crozer Q

WELLER, GEORGE ANTHONY. Crack in the column. 370p $3 Random house
49-10328

A political novel about modern Greece, during World war II. It opens during the period of the underground resistance to the German occupation, and covers the liberation and civil war, and ends with Greece still an unsolved problem, mainly for the Americans. There are many characters, chief among them two officers, an Englishman and an American, and the Greek girls they love.

"By far the best sections of the book are the too infrequent touches of irony and satire directed against American or British conduct of the war or against the many incongruities of modern war itself. War holds no illusions for Mr. Weller and he sees and reports it quite clearly as a number of loosely connected individuals doing something in particular part of the time and nothing in particular most of the time. . . It is unfortunate that instead of this book, Mr. Weller could not have written what he gives every indication of being able to write—a delightful satire of the war in Greece in the manner of Evelyn Waugh's Scoop." Written tightly, with no transitions to carry over the breaks from one group of persons to another, and with a huge cast of characters, —Greek (with difficult names and yet more difficult political affiliations), British, American, Russian, even Turkish and Hungarian,—it seems—to this reader—to result in confusion worse confounded. . . It would take meticulously careful reading and established concern over the Greek situation to carry the reader through. It certainly wont be read for entertainment—or easy enlightenment."

There are many striking vignettes of people and places, many dramatic episodes that are very well handled, one excellent major characterization, that of Loulides the journalist. Though of necessity Mr. Weller must deal with 'forces,' he manages to keep his story, to a remarkable degree, on the human and humane level. But the novel, as novel, breaks up on the rock of Too Much." Margaret Marshall

"It is a tribute to Weller as a novelist and a reporter to say that he is able to fulfill his ambitious design. The disintegration of morale, the complex rivalries of Greek parties, the shortsightedness, venality, or apathy of British and American policy, the mixed heroism and confusion of the period, all are here. . . Those with axes to grind can argue about the accuracy of his analysis, but I think no one will deny that it is honest and painstaking, avoiding the numerous temptations to facile simplification and melodramatics. . . When Weller the novelist is writing about action, 'The Crack in the Column' can be exciting; when Weller the correspondent steps in to explain politics the excitement is apt to evaporate." What remains is an immense heap of literary shrapnel, through which the reader picks his way with increasing fatigue."

He has written a political novel, reaching far back in time as we measure it nowadays, and its pages fall like withered leaves on the lap of the remembering reader. It is a book which leaves the reader with an autumn feeling, a sense of the foreboding of a winter yet to come; an emotion written so strongly into every line that, once begun, it is as hard to put down as a personal diary discovered recently which tells, with a prophetic sense, of days long gone." WELLESZ, EGON JOSEPH. History of Byzantine music and hymnography. 358p il pl $10.50 Oxford

781.7495 Music, Byzantine. Hymns [49-6941]

"This comprehensive and definitive work on Byzantine music, the crown of the author's 35 years of unceasing efforts in this field, represents a major scientific accomplishment. The methodology applied throughout the book encompasses historic-philological, liturgical, theological, and last—but by no means least—musicological research. . . There are many chapters in the present book that abound with new, revolutionary findings, and others of excellently instructive and explanatory nature. Thus, for example, Chapter III draws a sketch of the popular, less spiritual side of Byzantine life, wherein the Circus held so history-making a place. In Chap. VII a brief history of the main concepts and doctrinal dilemmas of the Orthodox Church is given. . . Three magnificent musical appendices with 30 pages of carefully selected musical illustrations, a solid bibliography, and a good index conclude the book." Music Lib Assn Notes

---

"It will be the standard work on the subject for this generation. . . A thorough study of the book requires a good Latin and Greek background, particularly since the author occasionally fails to provide adequate translations. The patristic and hagiographic texts, however, are carefully interpreted, despite infrequent minor flaws, as for example the erroneous conception that the Sunday service of the Temple or of the Synagogue became a constitutional part of the early Christian liturgy. . . The terminology of all liturgies, and especially of all liturgical music, requires a study in itself. Dr. Wellesz of course masters these problems easily, but it seems to me he goes too far in expecting the same from his readers. . . Let us hope that this book, a standard work of the first magnitude, will be consulted whenever the problems of Eastern Church music are studied or discussed." Eric Werner

+ — **Music Lib Assn Notes** 6:611 S '49 2000w

"The author has taken pity on the complete ignorance of what will surely be the large majority of his readers and in his introduction has given a concise history of Byzantine studies as they have concerned themselves with music and hymnography. This introduction and the setting of the whole subject in its historical background give the work a general cultural interest and make it accessible to a far wider public than its somewhat forbidding title might suggest. Even a knowledge of the Greek language, though obviously a great advantage, is not absolutely necessary, since all quotations are accompanied by a translation."

WERNHER, HILDA. My Indian son-in-law. 274p $3 Doubleday 49-10813

In diary form the author continues the story begun in My Indian Family (Book Review Digest 1945). It begins with the arrival of the author's son-in-law and his second wife from a prolonged honeymoon. The period of settling down is described in detail as the older woman tries to adjust herself to the ways of an Indian household where she is loved and respected, but where her own Western ideas are not always in harmony with Eastern ways. The death of a dear friend; the problem of the division of India; and a conversation which she overhears finally cause the author to leave the home of her Indian son-in-law.

"One does not normally look for characterization in a diary, but since this one is clearly biographical, drawing on real people and palpably real situations, one is stopped time and again by the author's failure to convey them with any verisimilitude. Rashid, Miriam, Mrs. Wernher, the Brahmins Savitri and Dr. Kaushal, the friends and servants, all talk the same public-school idiom, all behave identically. They are beautiful and virtuous and drenched in a natural nobility that is a fair indication of how firmly resolved the author was to love everything Indian. But an unrelieved collection of saints and supermen is intolerable, and 'My Indian Son-in-Law' falls flat and hard on its good intentions." J. G. Hitrec

WERTHAM, FREDERIC. Show of violence. 279p $3 Doubleday

364.38 Murder. Criminal psychology 49-8713

"A thoughtful study of murder, by a psychiatrist. The author states that one of the most common causes of death in the United States—outranking tuberculosis in some regions —is murder, and that sixty per cent of the murderers get away with it. He does not hold that murder is a disease and that murderers are necessarily sick people; murder, he believes, is an index to the state of the society in which it occurs, and its large incidence in our society indicates a general callous disregard for human dignity and human life. In developing his main thesis—that murder is a preventable crime—Dr. Wertham discusses murder cases in which he was closely involved, either as a court witness or consultant, including two of the most dreadful crimes of the fairly recent past in New York." (New Yorker) Index.

Kirkus 17:132 Mr 1 '49 180w

"Like most writers who are troubled by their experiences and baffled in their efforts to contribute to justice and social welfare, Dr Wertham tends to feel a little isolated. . . This makes his book valuable for the stirring up of emotion about an ugly sore in our social organization, but it makes it a poor guide as to what is being done or what can be done." Karl Menninger, M. D.

"Dr. Wertham's book lacks a bit in organization and is somewhat loose from the technical point of view. Too, it raises more issues than it solves. . . Undoubtedly, however, Dr. Wertham has written a book that can do much to focus popular attention on the whole problem of psychiatry and its relation to society and the individual. His book cannot fail to make some legal faces red nor can it fail to encourage the psychiatrist to continue the study of crime as a psycho-social problem of the greatest urgency." Abram Kardiner

It will take time to show just how valid his thesis and supporting evidence are. . . My statement of some of Dr. Wertham's more controversial views might suggest that he has an axe to grind. Actually, he has none. He is, above all, a humanist whose sincerity shines through every ringing sentence of his book. The weakness of his position, it seems to me, lies in the fact that, in holding up such high expectations for the individual and society, he is ahead of his time." W. M. Hitzig, M.D.

Respect is due Dr. Wertham for having essayed what at best was a difficult and delicate chore. "Alexander Campbell is best known for the part he played in the founding of the Disciples of Christ; but Mr. West here presents him as one of the outstanding champions of revealed religion against the atheism and Deistic naturalism which were wide-spread in America in the late eighteenth and early nineteenth centuries. . . Part One of this book is taken up with a review of Campbell's Attack Upon Ecclesiasticism. It was the danger of this attack to revealed religion itself, as seeming to encourage the forces of unbelief, that led him to engage in the long debate in defense of what he believed to be fundamental Christianity. The account of it, and a statement of Campbell's views are in Part Two. Part Three, under the title, Philosophy of History, is concerned with his doctrine of the millenium, and the changes it suffered in face of events." (Churchman) Bibliography. Index.

Having registered this single complaint one can acknowledge a great deal for which to be grateful here. Fr. "Rural Mexico has a flavor and tone which should appeal both to the general reader and to the specialist. It should be an extremely useful reference or supplementary text for courses in Latin-American culture and institutions or comparative rural sociology. It does not purport to be a compendium on Mexico. It is not a comprehensive, unselective study of statistical facts. Salient features and significant facts bearing on them are examined in functional relation to each other. It becomes, therefore, a virtually indispensable instrument to an intelligent understanding of that civilization." N. D. Humphrey

"Obviously not all parts of such a lengthy volume are of equal quality. Some sections such as most of Part I and a large portion of Part IV are summary in nature, and leave much to be done. On the other hand, one will search the literature in vain for anything remotely comparable to the analyses of the agrarian aspects of the revolution, the Ejido, colonization and settlement, and the Sinarquista Movement. The most glaring deficiency is the lack of any reference, in the text or the lengthy Bibliography, to 'the Laws of the Indies.'" T. L. Smith

WHICHER, GEORGE FRISBIE, ed. Goliard poets; medieval Latin songs and satires with verse translation. ltd ed 303p il $7.50 New directions
879.108 Latin poetry, Medieval and modern —Translations into English 49-11520

"Mr. Whicher has collected and translated some seventy-five of the so-called Carmina Burana—the secular songs, chiefly anonymous, of those disreputable, frequently Rabelaisian, wandering students of the twelfth century who dedicated themselves, as members of an outrageous parody of an Order, to the cult of one Golias. This Golias is a mysterious figure. Whether he is a personification of the sin of Gluttony (Gula), or whether his name is connected somehow with the giant Goliath, we cannot say; but he stands for all that is irresponsible, alcoholic, amorous, and wittily blasphemous in a period when the learned young *clerici* were considerably more colorful and infinitely less decorous than their modern counterparts, the divinity students of today." WHIPPLE, MRS DOROTHY. Because of the Lockwoods. 301p $3.50 Macmillan
49-9918

The intertwined fortunes of three English families form the background of this novel. The Lockwoods were wealthy, thanks to Father's manipulation of other people's money, but that was unknown for years. The Hunters were poor and bullied by the Lockwood family. The Reades were not only poor, but common, but it is Oliver Reade's devotion to Thea Hunter which finally paves the way for the downfall of the Lockwoods.

"Mr. White's subject is the ideas of that remarkable group of men—Holmes, Veblen, Dewey, Beard, James Harvey Robinson—who did so much to give the liberal imagination in America its present contours and impetus. . . Professor White believes that the key ideas of these men bear a striking family resemblance to one another, and can be understood as the expression of 'the revolt against formalism'—against deductive economics, formal logic, Austin's analytic jurisprudence, and that kind of history which treated the Constitution as though it were created at a congress of logicians. Two positive ideas characterized this revolt: 'historicism'— 'the attempt to explain facts by reference to earlier facts'—and 'cultural organicism'—'the attempt to find explanations and relevant material in social sciences other than the one which is primarily under investigation.'" "Mr. White has exhibited in his analysis and criticism a fine sense for the dialectics of ideas and for their interrelationships, as well as a talent for reducing complex ideas to simple terms. At times his skill in textual analysis has led him to be much too literal with his materials, and he is hardly as deft in dealing with the inner urgency, the personal dimension, of ideas, or with their historical context, as

he is with their logical structure. This is an ironically formalistic failing in a book that celebrates the decline of formalism, but it should not be overstressed." Richard Hofstadter

Here too an emphasis is placed on the often neglected years of youth, the strong family attachments, the fervent patriotism which survived all the years abroad. There is not too much of his music, or musical interpretation, and Chopin's life is closely followed; the early recognition of his great gifts; the departure from Warsaw for Paris where his success was spontaneous; the passionate affair with Delphine; the subsequent love for Maria; and finally George Sand, from the sequestered idyll at Majorca to the return with her to Nohant which became his adoptive home for eight years." "Mr. Wierzynski is a thorough scholar in all matters relating to Chopin's life. He is also extremely well informed about the entire cultural pattern of Chopin's era, and his literary style, as refracted through Norbert Guterman's translation, is both easy and subtly brilliant. His book, therefore, is probably the most thorough, well balanced and readable life of Chopin that has yet appeared in any language. This, however, is distinctly a novelist's biography rather than the work of a musicologist." Alfred Frankenstein

"Where other biographers may marshall all the available facts, Mr. Wierzynski can fill them out with the breath of life. "I am convinced the appearance of this book will mark, in English-speaking countries at least, a turning point in the public's judgment and appreciation of Chopin's stature as a human being and therefore as musician. It has been said, and the pianist Artur Rubinstein in his introduction to Wierzynski's book confirms this opinion, that understanding and hence interpretation of Chopin's music is a natural endowment of Polish pianists. . . 'The Life and Death of Chopin' is a monumental piece of documentation. I marvel when I think of the plain physical effort it must have taken to collect, some 4,000 miles away from the theatre of Chopinesque operations and with present communication difficulties with Poland, these innumerable items, facts, dates, incidents, and details." Other aspects of the book also merit appreciation. Shelter Point, the fictional town where the story takes place, is described with great visual validity. This volume is more than a plea for ratification of the charter of the International Trade Organization; it is a brief study in economic history since the end of World War I with a backdrop of a climactic century of progress, a golden age of no-passports, few trade restrictions, and trade relations that ironed themselves out under the gold standard. . . [It] is the story of years of effort. The proposed trade organization grew out of proposals prepared by the United States Government in 1945. But the Atlantic Charter and the Master Lend Lease Agreements contained the seeds of it. From 1945 to 1948, the ascent is marked at every hard short mile by negotiation, study, renegotiation. . . The author was vice-chairman of the American delegation, and acting chairman during the extended absence of its official chief, W. L. Clayton." (Christian Science Monitor) Index.

"The best way to think of the collection is to regard it as a unit, as the book of Fraternity. . . As in all the best narratives the characters make the story. In this chronicle of Fraternity Village they are mostly the men who congregated at Will Bissell's store for supplies and conversation, and if it is one man's book more than another's, it is Chet McAusland's. "This world is set forth in a prose so deft that, though occasionally obscure from sheer multiplicity of connotation, it is never heavy; and so quiet that it gives no warning of the sudden brilliant insights stated within the compass of a single sentence. "Descent Into Hell, in spite of a certain amount of thriller material, is a rather slow and ponderous presentation of a world in which living and dead, shadow and substance, past and present are strangely overlapped and mingled. . . The characters for the most part remain annoyingly vague. . . Undeniably, the author may have something serious to convey, but he might have done it better through the medium of the poem or the essay. The most enjoyable quality of the book is its rich, analytical (but never dramatic) prose style. . . There is a certain vagueness and indecisiveness in the treatment of the theme. Ideas are stubbornly elusive. There is a good deal of talk about 'a terrible good,' a term which never does quite make sense. . . All in all, this can hardly be called a significant Christian novel, although it will please those intellectuals who shy away from clarity in things spiritual and theological and would transform a mystery into a puzzle—with any number of correct solutions." "A metaphysical novel, perhaps; or, better still, a mathematical one of the Einsteinian variety. The thing that Mr. Williams employs in order to give play to his time-space shenanigans is a stone, an ancient Persian stone, whose properties enable the possessor of it to fly through space and time. It is also capable of splitting itself or reproducing itself without losing its original intactness. . . Not only is the Persian nation concerned, and the British Ministry; so are divers persons and sundry vested interests, such as an evil scientist, an airplane titan, and a transport workers union. . . The author's Lord Arglay, who is the Chief Justice, is a man of justice, and wins out much in the same way as any first-rate private eye in a whodunit." Atlantic

"The accent of Charles Williams is unique. Although he follows in the great tradition whose activity runs down through Dante and Donne from St. Paul, exploring and expounding the Affirmative Way, he remains a wholly original mind, and the first encounter with him is apt to be startling and unforgettable. To read only one work of Charles Williams is to find one's self in the presence of a riddle—a riddle fascinating for its romantic color, its strangeness, its hints of consciousness; but to read all is to become a free citizen of that world, and to find in it a penetrating and illuminating interpretation of the world we know." Though he is in reality preaching, his reader is not conscious of it because he preaches between the lines of an extremely absorbing tale. His work defies classification. "Williams' handling of his theme is less sure than in his later novels. The characters, except for the Archdeacon, are sketchy and conventional, and the action is sometimes too close to the stock mystery story for pleasure. When the battle is truly a spiritual one, Mr. Williams is remarkably successful in conveying a sense of certain states of the soul far outside the range of normal human experience. "The circumstances and details of the land grabs, or speculation, that motivated the revolt of Texas against Mexico, and the subsequent annexation of Texas by the United States. Professor Williams (University of Washington), makes evident the interest, for profit, even in high places in Washington, D.C. "The existence in the United States of companies which sold valueless scrip to be located on Texas land during the periods of colonization and annexation is well known, but there has been singularly little progress toward a comprehensive account of the organization and operation of these companies; and this book neither by purpose nor by welcome inadvertence helps to elucidate the subject. . . The American Historical Review could not appropriately allow space for extended discussion of the shortcomings of this book, but a few typical deficiencies must be noted: misuse of citations is frequent—some incomplete, some misconstrued, some inapplicable to the corresponding statements in the text. "His technique is uneven, even in such a 'slim volume' as 'The Clouds': it is not always equal to his insights or his understanding. But though his poetry may sometimes be slapdash or inadequately pulled together, it is (and of how few modern poets can this be said!) never uninteresting. He remains one of the central modern American poets. It is no accident that almost any 'little magazine' one takes up is likely to open with a poem by Dr. Williams: this is one among many indications of his desire to be with those who are continually pioneering in poetic methods of probing and interpreting the human situation in our time." "It gives us a Clemenceau in the raw, so to speak. While it conveys to the reader a keen sense of his extraordinary personality, it also does much to indicate the terrific impact that this republican cyclone made upon his countrymen through his passionate likes and hates, his ferocity of temper, his lacerating wit, his great moral and physical courage, his disillusionment in man and his love for France." Wythe Williams has therefore done good service to the memory of the man, who, perhaps more than all others, won the victory over Germany in 1918. "An interesting book, and an admirable introduction to the political life of the late Third French Republic. For Mr. Williams has carried over from his newspaperman's training one great virtue: he writes clear, systematic exposition, as if for a reader who knows nothing about the subject. . . How accurate an account is another matter. . . To begin with, Mr. Williams is a worshiper. . . The finish is a bit too good. The net effect of Clemenceau's personality as it comes through is almost certainly sound and just, but a bit too consistent, a bit too perfect, a bit too much of a portrait, in the unfavorable sense that the word 'portrait' has for the determined realist. . . Another example of a perfection that arouses a reader's distrust is the extreme clarity with which Clemenceau in the 1920's foresaw the events of the 1940's." Crane Brinton

320.973 U.S.—Politics and government. Political science 49-8235

In this textbook for college courses in American Political Theory the author provides a survey of the main ideas, principles, and trends in American political thinking from colonial times to the present. Chapter bibliographies. Index.

"Uninspired, as a textbook is supposed to be, this one is well-informed, as a good textbook must be. It is historically informed, laying foundations in England and Europe for our colonial thought, and solid groundwork in the colonial era for our constitutional and subsequent periods. Particularly does the author stress the state constitutions as a warp and woof for our federal development. The treatment is historically informed, too, as to structure, since the outline is chronological rather than logical. . . It is dialectically informed, but not as thoroughly as I should wish. It seems not too much to expect . . . that even inside the historical framework there be logical divisions (as for one example) of democratic theory into, say, liberty, equality, fraternity. . . The author undertakes to bring back into focus the conservative strand of our national tradition, and this resolution is worthy of applause. It is to the manner of assessing this task and the partiality of performance that I would enter a mild demurrer in an otherwise enthusiastic review of a solid performance." T. V. Smith

"Textbooks in political theory generally attempt to steer a trembling course between the Scylla of objectivity and the Charybdis of interpretation, moving close enough to be permeated by the virtues but not so close as to be overcome by the vices. Professor Wilson seemingly began with this intention, but he soon yielded to the voice of the temptress. As a result, he has produced not a balanced text in political theory but an exegesis of American conservatism, and why he believes in it. As such, it may serve a useful purpose. Conceived as a more general work, however, this book has serious limitations." David Spitz

WILSON, JOHN HAROLD. Court wits of the restoration; an introduction. 264p il $4 Princeton univ. press

820.9 English literature—History and criticism 48-4835

For descriptive note see Annual for 1948.

"Mr. Wilson's collective biography, besides achieving marked economy of space, is both scholarly and entertaining. If I have any fault to find, it is with two of the opinions he expresses. I doubt, in the first place, whether the scandalous behavior of these exhibitionists has been exaggerated and whether they were no worse than others—unless by others are meant Old Rowley himself and the duchess of Cleveland. They worked hard to achieve their reputation for 'gallantry.' . . Mr. Wilson is inclined also to minimize their contribution to dramatic literature." C. A. Moore
+ — **Am Hist R** 54:663 Ap '49 240w

"Professor Wilson writes with critical detachment, stating his facts soberly and impartially. His judgment, however, is occasionally less impeccable than his knowledge. When he tells us that to the Wits 'love was lust—no more' he is surely over-simplifying for the sake of emphasis. . . The glimpses he gives us of Savile are among the most delightful things

WILSON, J. H.—*Continued*
in his book, and it is a pity that with some of his other Wits he tends to allow the rake to elbow aside the man. But with such slight reservations this book is to be sincerely welcomed. Students of the period are indebted to Professor Wilson for an authoritative account of one important aspect of Restoration life and literature, packed with information, fully annotated, and salted with just enough dry wit to give it a characteristic flavour."
+ — **Times [London] Lit Sup** p55 Ja 22 '49 750w

"Despite a style sometimes laborious with parentheses and a double set of notes, the analysis is clear and well arranged. Except for an unnecessarily detailed examination of the drama, Mr. Wilson has well proportioned his attention. He has not generally attempted to discover new materials, but he has carefully sifted all the information in print, and has presented a reliable and interesting report. An appendix gives handy chronological summaries of the fourteen lives, and there follow a select bibliography and a score of pages of careful documentation."

WINTERS, YVOR, ed. Poets of the Pacific; second series. 128p $3 Stanford univ. press

811.08 American poetry—Collections. American literature—West 49-9205

A second volume of poems (the first appeared in 1937) written by twelve writers at one time pupils of Yvor Winters at Stanford University.

"There is too much form, too little fire in most of the poems. There are few examples of linguistic exuberance, linguistic subtlety or stylistic daring. As against these general strictures there are good poems, and if the reader's taste leans to competence and quietism he may find here considerable work to enjoy." Richard Eberhart

+ — **N Y Times** p10 Jl 10 '49 400w

"Through the years, Mr. Winters has emphasized form in poetry, and his influence is apparent all through the collection, so much so that the poetry, although usually wonderfully written, tends toward monotony. Only two out of the twelve poets included are undergraduates."

New Yorker 25:139 O 15 '49 60w

"Most of these poets have good minds, good ears and achieve admirable form yet, as often as not, their thoughtful disciplines, on closer scrutiny, turn out to be inhibitions—as if they had approached the Pierian Spring with temperance pledges and ears cocked for curfew. I thought there was more madness on the West Coast. Having long admired Yvor Winters as a stubborn and intuitive fellow who couldn't be hexed esthetically, I have an uneasy feeling that some of the young people in his orbit may have had the poetic daylights scared out of them." T. H. Ferril

San Francisco Chronicle p18 S 18 '49 160w

"Behind all these able and honest poems I sense the gravity, the intellectual power, and the rigorous artistic conscience of Mr. Winters himself. And I must add that I feel in many of them a constrained and resolute quality no doubt also ascribable to him. Here is literally a school of poets. Since it is certainly not a school of parrots, I see no reason for alarm or even surprise at this manifestation." J. R. Caldwell

A brief memoir of his mother, written by the son of Rabbi Wise. "All through this book runs the love-story—the domestic drama of home and family. But early in her life this widens out into Mrs. Wise's work for orphaned children. Then, under the stress of war and the agony of Israel, there came her labors for refugees—the utter surrender of her life to the need of her people in their direst hour. For years she was the tireless servant of all who needed succor—the weak, the sick, the homeless, the frightened. Nor did her ministrations stop at any boundary of race or creed." "It was time for such a book. So much official evidence has come out, at Nuremberg and elsewhere, and so many diaries, letters and memoirs of important actors in the drama have been published in the last four years, that an intelligent study of all this material, taken in its historical order, with a critical correlation of the accounts given on all sides, had become imperative. Here we have a straightforward, coherent account of what happened and how it happened... The book shows first-hand acquaintance with the scenes and some of the characters that figure in it, which is an almost indispensable basis for any evaluation of documents so close to us in time. Scholars of the future may judge by documents alone, but in 1949 it is still too soon. Even Miss Wiskemann, with all her advantages, falls into an occasional error by relying too much on Axis documents." Vincent Sheean

"The author is a scholar, and this is a scholar's book, to be read for instruction rather than relaxation, with attention rather than with any easy languors. The style is terrestrial, not airborne. There are fairly numerous passages in French, and essential terms and phrases in German and Italian. Miss Wiskemann provides all the prescribed paraphernalia of the scholar—the sources, the circumstances, the footnotes and the bibliography. Inevitably, there will be differences of judgment on some of Miss Wiskemann's interpretations and even as to some of her facts. . . But it will take research and analysis as thoroughgoing as Miss Wiskemann's to prove her wrong." W. R. Deuel

"Although a thorough work and deliberately addressed to the student of world politics, Miss Wiskemann's study is very readable, and this not only because the *dramatis personae* are unusually colorful people but also because the author is a brilliant biographer and analyst as well as a general historian who knows Central Europe and lived there many years. Thus she makes us follow the moves of the Axis powers as we might follow a game of chess." H. B. Kranz

"The value of Miss Wiskemann's book is that it not only provides a study of pre-war diplomacy which ranks with Professor Namier's and Mr. Wheeler-Bennett's books, but that it carries the story right through to its grim and fantastic end. Nothing is more important in the difficult art of writing recent history than the question of where to start and where to stop. . . Miss Wiskemann's skill as an historian is shown in her mastery and use of her sources; she knows how to use quotation without clogging the flow of her narrative." Alan Bullock

"On few points is her interpretation open to criticism. She argues that Mussolini's Abyssinian adventure, which first gave Hitler his chance and destroyed the 'Stresa front' of Britain, France, and Italy, was 'to a large extent an anti-German action.' It is difficult to appreciate her argument. . . In the same chapter she accepts perhaps too easily the story, admittedly supported by M. Flandin in his memoirs, that Laval made no secret agreement with Mussolini at Rome in January, 1935. . . When dealing with Munich Miss Wiskemann hardly considers all the available evidence before concluding that Hitler really wanted war and was annoyed with Mussolini for preventing it. These are minor criticisms of an admirable study which shows great knowledge of the available sources as well as scholarship in the use of them."

WOLFERT, IRA. Act of love. 577p $3.95 Simon & Schuster

48-10610

Describes the thoughts and reactions of a wounded navy flier, Harry Brunner, who is washed up on a small Pacific island after his ship sinks. He is nursed back to life by the natives, and in time joins the only white family on the island, and falls in love, half-heartedly, with the daughter of the family. But the main motivation of the novel is Brunner's fear—of life, of love, of death. Finally he realizes that his real battle is within himself, and it requires "an act of love" to solve his conflicts.

"Although this is fairly standard Illumination, it makes a large and earnest theme. But, the advance build-up notwithstanding, I found Mr. Wolfert's handling of it unimpressive. There is too much here one has read about before: the protracted jungle fighting—in The Naked and the Dead (and better done); the insistent and elaborate commentary on womb-seeking and such—in many a page of clinical fiction and in texts on psychiatry for the uneasy layman." While Mr. Wolfert's statement of his problem is a long voyage through the jungle of desire, his solution is far more interesting and credible. When Brunner joins the invading American Army the author turns his excellent talents as a reporter to good account. The description of the battle scenes is vivid and exciting, the characterizations instinct with life. Brunner's triumph over his death wish by a deliberate act of the will, is a welcome climax. There are some readers who will rightly find several protracted passages in this book disgusting. But the book as a whole is not so much disgusting as it is saddening." F. X. Connolly

He has intensity of expression, a thoughtful man's awareness of the dualities that complicate life, and an analyst's—an amateur analyst's—implacable concern with the motivation behind motivation. But 'An Act of Love' is not a glorification of war. Rather it is the tragedy of man who has conquered all but man and so devises his own destruction, and in building this intricate story Wolfert has followed Brunner on a veritable pilgrim's progress." "The last third of An Act of Love is a first-rate, exciting war report. Correspondent Wolfert can describe a battle in its coherent entirety while focusing attention on a few men fighting in it. But as a novelist, he cannot bring to life the feelings of men in war with the same vividness that he brings a battle to life. The book is more useful than the author supposed it to be, since he wrote it assuming that the Eighty-first Congress would revise the Taft-Hartley Act pretty much as the administration and organized labor desired. . . There are some minor flaws in the writing of the book. The style, though often succinct, suffers from carelessness; at several places it reads like a rough reference outline. "This old man was nobody's fool; he knew all was not for the best in this best of all possible worlds, and said so, often, and passionately; his possession of a social conscience, however, did not inhibit his enjoyment of life, his sense of privilege and wonder. Personally I like, better than the important largenesses of The Poet in the Desert, the pictures and songs in the poems from the ranges, the labors of man and beast, the things noted as year and day turn, the love poems, such as who would think of writing nowadays? The real warmheartedness, the appearance of simple-mindedness should not distract the reader from the excellent craftsmanship." Rolfe Humphries

"No one will quarrel with Wood's revolutionary ardor, his abhorrence of privilege, his zest for life, his uncompromising devotion to social betterment. As a poet, however, it is difficult, with all the good will in the world, to accord him major rank. In the tens of thousands of words which poured from him, one comes upon many passages of arresting power and splendor, but the highest levels are not often scaled, and the output on the whole is only better than average." "Book of recipes compiled by Morrison Wood, whose cookery column, 'For Men Only,' is one of The Chicago Tribune's most popular features. . . [He] has a particular penchant for cooking with wine; hence the title. But he's no bigot on the subject. . . Wood's book is no mere catalog of recipes. It is also a gourmet's guide and short history of the culinary art. Every recipe is introduced with remarks by the genial author, some explaining the origin of the dish, or discussing variations, or relating personal or historical anecdotes connected with it." "While I can't agree with everything he says about American vintners, it must be conceded that the opening section on 'Wine' is a priceless guide to this sometimes obscure subject. WORMUTH, FRANCIS DUNHAM. Origins of modern constitutionalism. 243p $3 Harper
342.42 Great Britain—Constitutional history. Constitutional history 49-716

"This book traces the history of constitutionalism with special reference to the contributions of seventeenth-century England. The essence of constitutionalism, says Professor Wormuth, lies in the use of what Alexander Hamilton called 'auxiliary precautions' to limit and confine government. Of these, two have been particularly important: first, institutional arrangements; and second, the maintenance of the proposition that law should be general and prospective. Now both of these elements have a long history. In a short introductory section, Professor Wormuth shows that they go back to the Greeks and that they were continued and developed further in the Middle Ages. But he argues that their modern forms come chiefly from seventeenth-century England. . . In the process he discusses such landmarks as the Agreement of the People, the Instrument of Government, and the Humble Petition and Advice. Then in the concluding section of the book constitutionalism is traced, although less elaborately, into the eighteenth and nineteenth centuries." Am Pol Sci R

"It must be said that the presentation of these matters is not always very artistic. There are too many short chapters and too many long quotations that interrupt the flow of exposition. The brevity of the book is such and its range of subject-matter so wide that more points are raised than can be discussed fully. Nor does the style seem to the reviewer very lucid. . . These blemishes certainly lessen the usefulness of Professor Wormuth's book in the teaching of government and political theory to undergraduates. But the work will be very useful in spite of them. Professor Wormuth has read widely, both in the sources and among standard secondary authorities. He has made accessible to students and teachers much material not otherwise easily tapped. If his findings are not startlingly novel, they give us a better perspective on the place of seventeenth-century England in the Anglo-American constitutional tradition." T. P. Peardon

321.04 International cooperation. International relations 48-10564

For descriptive note see Annual for 1948.

"The book reflects the abstract and theoretical plane on which the conference proceeded. There is no analysis of the extent to which the world is a community (or a society) and little treatment of concrete steps that might be taken to make it a more perfect community; neither is there much pointed discussion of the attributes of a more perfect community. . . Two incidental comments might be made. First, the opening parts of the book are marred by successive reversals in the definitions of the terms community and society. . .

Second, the discussion of Mr. Boulding's paper is especially worth reading because of the sparkling and provocative (though sometimes irrelevant) observations which he made." Vernon Van Dyke

the preface has much to offer, especially in outlining the deepening of Wyatt's expression of a 'considered attitude toward love and moral experience.' The treatment of Wyatt's stanzaic structure as the origin of later developments among the Elizabethans is sound and suggestive. . . The selection of twenty-eight poems is beyond cavil, and the arrangement, leading up to the First and Third Satires and the First and Third Penitential Psalms, is just right. Mr. Swallow has studied the various texts with a view to reproducing the most accurate of them and has modernized the spelling with skill. The book is to be highly recommended." Robert Hillyer

The title derives from the writer's admission of being the author or co-author of twenty earlier books. The focal point is a fashionable New York hotel and the time is today. The story is told in the first person and for the most part is a series of dialogs between the author and at different times a physician, a nuclear physicist, a wife fleeing her husband who has homosexual tendencies, a call girl, and others. All are able to take full part in the many dissertations on life, love, lust, sex, civilization, Christianity and other cosmic problems that fill the book. Readers of earlier Wylie books will recognize the underlying premise, "man is probably the lowest of the animals."

"A staunch admirer of Generation of Vipers, I find a good many of Mr. Wylie's ideas uncommonly sound, and his objectives laudable. As a crusader, though, he is less than lucid; and as a novelist, he is less than adequate."

At length (723 pages) and in detail he traces the transformation of Japan from then until now—the political and social changes, diplomatic relations and military adventures, industrial and economic changes, educational and religious movements, the rise of the 'Greater East Asia coprosperity' policy as a means of securing 'economic self-sufficiency' for Japan, and finally Pearl Harbor, Hiroshima and the rest." "Excellently edited. A considerable number of selections have been taken over from two earlier volumes of translations under the same editor but in many instances these have been revised. However, selections from more than thirty new poets have been added to this volume, which give it a scope greater than that of any other anthology of Russian verse in English. Unfortunately, only two pieces from Derzhavin represent the eighteenth-century tradition of Russian verse, and one regrets the relatively few pieces drawn from the Golden Age of Russian poetry, with the exception of Pushkin, who is well represented." YEARS of the modern—*Continued*

"Quality is the word that best describes this book—quality of thought, quality of phrase. But there is quantity here, too—quantity packed in, disguised in brevity, having the density and social potency of an intellectual uranium. . . To say this is to set 'Years of the Modern' almost on a shelf of its own among symposiums. In it twelve writers of unequal reputation show equal command of their material and make equal claim on our respect. As fact can be stranger than fiction, so, we find here, the profound can be more entertaining than the frivolous." Carlyle Morgan

+ **Christian Science Monitor** p20 N 10 '49 650w

"The book has its omissions, of course. Most surprising perhaps are the absence of any appraisal of the state of the American culture, or of the role of religion in American life. One also misses a discussion of the Negro, and of business and labor as social and psychological forces. But within these limits John W. Chase has done an imaginative and exceedingly successful job in defining the topics and securing the right authors." Arthur Schlesinger, Jr.

+ — **N Y Herald Tribune Bk R** p3 N 20 '49 950w

"What it adds up to is an analysis of the American past, an examination of the American and his ways as they are today, and on the whole a hopeful look into the future. Our democracy, as these writers see it, is not complete, but it has powers of growth." R. L. Duffus

N Y Times p7 O 30 '49 1200w

"The last essay in the book, well placed because it does more for synthesis than the others, is the account of his own re-education by Norman Cousins. . . The 'Years of the Modern' come out in the thinking of a serious and sensitive young mind as the years in which America has to accept leadership in uniting the world in practical peace. There are hints in the other essays that indicate what right we have to take such leadership and what qualities there are in the American character that others might try to imitate. After some deliberation on the variety, the unevenness, and the energy of these twelve essays, one is inclined to accept with contentment the idea of the modern American as a character so complex and free that only a polyphonal voice can speak for him." "'Pride's Castle' succeeds in conveying the piratical vigor and ruthlessness of the fortune-builders of the Seventies and Eighties. The author makes a bow to social significance with accounts of downtrodden labor, the misery of the panic years, and even the needling into labor of the early Communists. But it is the melodrama and gusty story-telling about this Paul-Bunyan-Jr. hero that will probably insure 'Pride's Castle' a popularity to rival 'The Foxes of Harrow.'" Beatrice Sherman

A novel of a lonely girl. Spike-heeled shoes made Maybelle Reardon look like "a tough," and it was not long before she became one, ostracized as she was by the other high school girls. Marriage to quiet Jim Paige gave her the life of middle-class respectability she needed. When Jim, at a Southern army camp, went A.W.O.L. to live with another girl, Maybelle nearly went back to her old way of life. She was saved, however, by the good advice of a priest.

"Miss Zaturenska has concentrated upon describing the background against which Christina Rossetti moved rather than upon chronicling her life, and her description is pleasant and detailed. All the Pre-Raphaelites and their friends pass through her pages but their procession too often thrusts out of sight the dumpy figure of the poet who watched the pageantry from afar. Had Miss Zaturenska—herself an accomplished poet—narrowed her scope and made it her purpose only to lay bare the secret hidden in Christina Rossetti's verse, she would have written a more original, though perhaps a less attractive, book." "Part I of the book is titled Elasticity of Metals and contains, besides a brief outline of the classical theory of elasticity of continua, chapters on the elastic constants and on micro-elasticity, that is, stress-strain relation in crystallographically perfect elementary regions. Part II, Anelasticity of Metals, develops first the formal theory of anelasticity on the basis of the 'standard linear solid' and its generalization by means of Boltzmann's principle of superposition. The experimental techniques used in measurement of relaxation spectra are outlined, and then the various physical manifestations and interpretations of anelasticity are presented in detail." ZILAHY, LAJOS. Dukays; tr. from the Hungarian by John Pauker. 795p $3.50 Prentice-Hall
48-11770

Family chronicle about the aristocratic Hungarian Dukays. The time is roughly from 1868 to 1939, and covers the life of Count Istvan Dukay. The novel is divided into three sections, the last two devoted to the two Dukay daughters: Kristina, who was hopelessly in love with Charles, the last Hapsburg ruler of Hungary; and Zia who divided her lands among the peasants.

808.81 Poetry—Collections 48-10660

"What Mr. Zukofsky intends is that poetry be read for itself, as poetry, and not as a poem by Shakespeare or Shelley. . . Mr. Zukofsky eliminates in two of his three sections the names of the poets; thus the reader is face to face with a poem and not with a reputation. His second intention is to give the reader an introduction into comparative poetry. Several poems on one subject are grouped together (thus, two poems on the weather, one by Shelley, the other by Hopkins), and the reader may examine profitably the individual tries within a team of poems. In the middle section Mr. Zukofsky does what the reader ought to try to do in the first and third sections—that is, he makes comments about the various poems." N Y Times

"The intention of this anthology is not clear: for whom is it designed—the studious reader in general? the college undergraduate? . . Mr. Zukofsky's erudition provides useful antidotes against the cultural lag, the moribund influence, of nineteenth-century verse tradition: well-informed in early English poetry, including a knowledge of the good translators, Golding and Bishop Douglas, his taste is for the intellectual rather than the sensuous. He knows, and insists on, the importance of design and sound, dislikes the Brahmsesque kind of music, is on the side of some of the angels." Rolfe Humphries
